

1. PROJECT OVERVIEW

- **Project Title:** ComicCraft - AI Comic Story Creator using Gemini Models

2. INTRODUCTION The successful completion, testing, and demonstration of ComicCraft was achieved through the collaborative efforts and structured division of responsibilities among all team members.

3. INDIVIDUAL ROLES AND CONTRIBUTIONS

- **Team Leader (N.Sopya):**
 - Overseeing overall project architecture, coordinating sprint milestones, managing FastAPI routing logic (`routes.py`), and ensuring all SmartInternz documentation standards were met.
- **Team Member 1 (S S Sathyabala):**
 - Focused on frontend UI design, building responsive HTML/CSS layouts, and implementing Jinja2 templating for the home and comic preview pages.
- **Team Member 2 (Mohamed Ajmal):**
 - Handled Google Gemini API integrations (`gemini_flash.py` and `gemini_pro.py`), focusing on prompt engineering for structured JSON outlines and narrative expansion.
- **Team Member 3 (Mohamed Irfan P):**
 - Developed the image generation pipeline (`image_generator.py`), implementing Hugging Face Stable Diffusion queries and robust dual-engine exception handling.
- **Team Member 4 (Mohamed jubair.P):**
 - Responsible for layout structuring (`layout_builder.py`), FPDF PDF compilation (`exporters.py`), performance testing, and organizing screenshot assets for the demonstration folder.
